

Quick Tips for Thanksgiving Food Safety

Article written by Cindy Brison, MS, RDN (<u>cbrison1@unl.edu</u>)
Extension Educator in Douglas-Sarpy Counties

Thanksgiving is a time for families to gather and enjoy each other - not suffer from food poisoning! Here are quick tips to keep your family healthy:

- The United States Department of Agriculture (USDA)
 recommends thawing the turkey in the refrigerator. It
 takes 24 hours for every 4-5 pounds of turkey, not
 including the day you cook it. A 20 to 24-pound turkey
 would take about 5-6 days to thaw.
- For optimum food safety, do not stuff your turkey. Place stuffing in a separate baking dish or pan to cook.
- USDA recommends an oven temperature no lower than 325°F for cooking a turkey along with using a food thermometer to make sure the thickest part of the turkey reads 165°F. A 20 to 24-pound turkey may take about 5 hours to cook.
- Avoid cross-contamination by using separate cutting boards, plates, and utensils when handling raw turkey.
 Wash items that have touched raw meat with warm soap and water or place them in a dishwasher.
- Refrigerate leftovers within two hours to prevent bacteria from growing on the food. Eat leftovers in the refrigerator within 3-4 days. Use the freezer to store leftovers for longer periods.
- Do not overfill your refrigerator, as it causes it to work too hard and may not keep foods at 40°F or below.

Healthy Holiday Safety Tips

- Clean out your refrigerator the week before an event to make room for thawing items and storing leftovers.
- Use a refrigerator thermometer to check that your refrigerator is 40°F or below.
- Frequently wash your hands with water and soap for 20 seconds.
- Simplify the day by preparing foods the day before.
- Do not prepare food when you are ill.
- Use a calibrated food thermometer for cooking.
- Store leftovers in shallow containers to decrease cooling time. This prevents food from spending too much time at unsafe temperatures.
- Keep leftovers in a cooler with ice or frozen gel packs if the food is traveling home with a guest who lives more than two hours away.

Nebraska Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United Sates Department of Agriculture.
